

COVID-19 Four-Pillars Approach

Posted by Brandy Killion on April 2, 2020

Sudden events such as COVID-19 can stun an organization and its ability to react adequately. **KPN Health** offers expert data extraction and aggregation capabilities coupled with experienced crisis management advisors to assist in uncertain times by expertly guiding organizational developments that affect or threaten healthcare practice viability. Crisis Management is a discipline, set of skills and techniques that are required to cope with a catastrophic situation from the moment it first occurs to the point that recovery begins. KPN is prepared to guide your organization through turbulent times with our four-pillar approach shown to the right.

Grant KPN Health access to your data (EHR and claims) and immediately we will begin extracting, integrating and aggregating data, providing your organization with endless possibilities and data scenarios to manage and drive outcomes in a time of crisis!

Funding

KPN has the expertise and experience to assist and guide physicians and hospitals to apply for "CARES Act" grants and loans available to sustain employees and operations necessary to meet the health care needs of patients during this time of national crisis and uncertainty.

Crisis Management

Crisis Management requires decisive experienced leadership to effectively guide organizational shifts necessary to deal with unexpected events that affect or threaten an Organization's viability. Sudden events such as COVID-19 can "stun" any Organization. KPN's unique blend of highly experienced business, healthcare and technology professionals are deeply experienced in crisis management.

KPN Optimize® Population Health

Uses advanced technology to assist healthcare personnel in identifying affected at-risk patients and those returning to the Community. KPN achieves meaningful improvements and outcomes "one" population at a time.

KPN Optimize® Transitions of Care

Tracks a patient's movement and seamlessly addresses the critical hand-off between an inpatient and outpatient community. Transitions of Care is an essential real-time data bridge that empowers clinicians and providers when dealing with patients and their challenges involving COVID-19 after discharge.
