

## COVID-19

Posted by Kim Pichanick on March 17, 2020

Friday afternoon, March 13, 2020 Pres. Trump declared a *National Emergency to combat Coronavirus (COVID-19), and authorized waiving of laws and regulations*. KPN Health (KPN) took immediate action and formulated a “**Crisis Action Plan**” (CAP) to support its clients’ administration of the COVID-19 crisis.

We understand KPN's Solution Sets are relied upon by healthcare managers, professionals and staff, advisory firms, accountable care organizations, clinically integrated networks and hospital systems to deliver essential services. We have repurposed our professional team to support our clients during this crisis. KPN is also working to ensure the health and well-being of our staff and community as concerns about COVID-19 grow. Like most of our clients, KPN’s professional team and staff are working remotely during this crisis and will continue doing for whatever period necessary.

During this COVID-19 crisis KPN is committed to maintaining the continuity and delivery of the same high quality service our clients are accustomed to receiving.

Should you require additional support or assistance during this time, please submit questions, comments and/or thoughts to [COVID-19@kpnhealth.com](mailto:COVID-19@kpnhealth.com).

Stay safe and well during this challenging time.

A handwritten signature in black ink that reads "Kim Pichanick".
